Webinars sobre TICs y herramientas de la web social para innovar
Programa de Formación de Profesorado 2017/18 (www.unia.es/formacion-profesorado/)

Coordinación: **María Sánchez- Área de Innovación** (@uniainnova).
Vicerrectorado Campus Tecnológico. Universidad Internacional de Andalucía

Objetivo y contenidos

El objetivo...

Introducir el uso de los gestores de referencias bibliográficas como herramientas de apoyo a la creación y comunicación de conocimiento científico

Contenidos

1. Introducción a los gestores de referencias bibliográficas: características y utilidad
2. Creación de cuentas e instalación de software
3. Captura y organización de la información
4. Análisis (compartido) de documentos
5. Utilización de la información en la creación de nuevo conocimiento

*Todos los ejemplos se harán utilizando Zotero

Introducción a los gestores de referencias bibliográficas

Características y utilidad

Gestores de referencias

- **Capturar referencias o documentos** desde múltiples sitios.
- **Organizar** la base de datos personal de referencias.
- **Insertar citas o crear bibliografías** de forma **automática** en documentos de texto.

Sociales

- Proporcionan una **red social académica** que fomenta la **colaboración**.
- Construir tu **red de colegas investigadores**.
- **Colaborar, difundir y descubrir**.

zotero

¿Qué es Zotero?

The image shows a screenshot of the Zotero website with several red annotations:

- 1**: A red box around the main text: "Zotero [zoh-TAIR-oh] is a free, easy-to-use tool to help you collect, organize, cite, and share your research sources."
- 2**: A red box around the navigation buttons: "Collect", "Organize", "Cite", "Sync", and "Collaborate". Below them is the text: "Grab your research with a single click."
- 3**: A red box around the top right navigation area, including "Log In - Register", "Upgrade Storage", and a "Download Now" button.
- A red box at the bottom right highlights the logo for the Roy Rosenzweig Center for History and New Media.

The website content includes:

- Navigation: Home, Groups, People, Documentation, Forums, Get Involved
- Search: Search support, Search
- Features: Collect, Organize, Cite, Sync, Collaborate
- Text: "Grab your research with a single click." "A personal research assistant." "Zotero is the only research tool that automatically senses content in your web browser..." "Store anything." "Zotero collects all your research in a single, searchable interface..."
- Footer: "Blog · Forums · Developers · Documentation · Privacy · Get Involved · Jobs · About · Mobile Site" "Zotero is a project of the Roy Rosenzweig Center for History and New Media..."

George Mason University, EEUU

¿Qué es Zotero?

The image shows the homepage of the Zotero website. At the top left is the 'zotero' logo. To its right, a navigation bar contains links for 'Home', 'My Library', 'Groups', 'People', 'Documentation', 'Forums', and 'Get Involved'. Further right are links for 'Settings', 'Inbox', 'Download', and 'Log Out', along with an 'Upgrade Storage' button. Below the navigation bar is a search box for 'Search support'. The main content area features a large red 'Download Now' button with the text 'Available for Mac, Windows, and Linux' underneath. Below this is a row of five icons representing 'Collect', 'Organize', 'Cite', 'Sync', and 'Collaborate'. A central heading reads 'Grab your research with a single click.' followed by the sub-heading 'A personal research assistant.' The text below explains that Zotero automatically senses content in a web browser and allows adding it to a library with a single click. To the right is a small inset image showing a browser toolbar with the Zotero icon and a 'Save to Zotero' button. At the bottom left, a small window titled 'Title' shows a list of files: 'bookreviews.pdf', 'in progress.doc', 'Outline for Hamlet', 'research data.xls', and 'Shakespeare's birth'.

Grab your research with a single click.

A personal research assistant.

Zotero is the only research tool that automatically senses content in your web browser, allowing you to add it to your personal library with a single click. Whether you're searching for a preprint on arXiv.org, a journal article from JSTOR, a news story from the *New York Times*, or a book from your university library catalog, Zotero has you covered with support for thousands of sites.

Store anything.

Zotero collects all your research in a single, searchable interface. You can add PDFs, images, audio and video files, snapshots of web pages, and really anything else. Zotero automatically indexes the full-text content of your library, enabling you to find exactly what you're looking for with just a few keystrokes.

Influence of motivational factors on utilisation of Internet health information resources by resident doctors in Nigeria

Item Type: Journal Article

Title Influence of motivational factors on utilisation of Internet health information resources by resident doctors in Nigeria

Author Ajuwon, Grace Ada

Author Popoola, Sunday O.

Abstract Purpose - This study aims to determine the influence of motivational factors: perceived ease of use (PEU), perceived enjoyment (PEJ) and perceived usefulness (PU) on utilisation of Internet health information resources among resident doctors in tertiary health-care institutions in Nigeria. The Internet has become a major source of health information for practitioners and the general public. Despite the availability of health information resources on the Internet, some resources are underutilised. There are numerous studies on Internet use among health-care workers; however, there is a dearth of information on motivational factors influencing utilisation of Internet health information resources among resident doctors in Nigeria. Design/methodology/approach - A descriptive survey design was used. Total enumeration technique was adopted to cover 1,200 resident doctors in 13 tertiary health-care institutions in southwestern Nigeria. A validated, self-administered questionnaire was used for data collection. The questionnaire has four sections covering the demographic profile of the respondents, PEU, PEJ and PU. Four hypotheses were tested at the $p < 0.01$ level of significance. Data were analysed using descriptive statistics, Pearson product-moment correlation and multiple regression analysis. Findings - There were more males (69.0 per cent) than females (31 per cent); respondents mean age was 34 years. The result revealed that PEU ($r = 0.181, p < 0.01$), PEJ ($r = 0.166, p < 0.01$) and PU ($r = 0.121, p < 0.01$) have significant relationship with utilisation of Internet health information resources by the respondents. Also, PEU, PEJ and PU collectively ($F = 15.366, df = 3; 897, p < 0.01$) have significant influence on utilisation of Internet health information resources of the respondents. Individually, PEU ($\beta = 0.864, df = 897, t = 3.90, p < 0.01$) and PEJ ($\beta = 0.349, df = 897, t = 3.050, p [0.01]$) were found to have significant influence on utilisation while PU ($\beta = 0.232, df = 897, t = 1.320, p > 0.01$) does not significantly influence the utilisation of Internet health information resource of the respondents. Research limitations/implications - One major implication of this study is that system designers and web content designers should design programs and websites that are compatible with the user's abilities. Medical librarians have a role to play in providing quality health content that is easy to navigate and pleasurable to use. Both the institutions and the government have a role to play in providing information and communication technology facilities to enable doctors access relevant health information resources easily. Practical implications - Introduction of information literacy training in the residency programme or inclusion as a component of the continuing professional development will enable resident doctors to know relevant online searching tools and search techniques for accessing health information resources which will be useful to their work. This will in turn increase their PU of Internet resources. Health sciences librarians (medical librarians) in the various institutions/centres have a role to play in training resident doctors on how to access, retrieve and evaluate online health information. Librarians should also train resident doctors on how to search evidence-based Medicine resources such as the Cochrane Library and PubMed Clinical Queries and Critical Appraisal of the Medical Literature to make informed decision in the management of their patients and for research purposes. They should be trained on how to organise bibliographic references using reference manager tools such as Endnote, Zotero or Mendeley. Social implications - The social implication of this findings is that systems that are easy to use should be designed, so that doctors will be able to access relevant information for research and patient care for better health outcomes. The easier and enjoyable the system is to use, the more resident doctors will access and use health information resources to improve their service and save more lives. Originality/value - This study examined three motivational factors (PEU, PEJ and PU) that influence the utilisation of Internet health information resources by resident doctors in tertiary health-care institutions in Nigeria. The result revealed that collectively PEU, PEJ and PU have significant relationship with the utilisation of Internet health information resources, but PEU and PEJ are the main drivers of use of Internet health information resources among the resident doctors studied. This study adds to the literature of motivational factors influencing utilisation of Internet health information resources by resident doctors in southwestern Nigeria. This paper is original because, to the best of our knowledge, there is no other study on motivational factors influencing Internet use among resident doctors in Nigeria.

The screenshot shows the Web of Science interface for the article "Defrosting the Digital Library: Bibliographic Tools for the Next Generation Web". A red box highlights the "Buscar Texto completo" button in the top navigation bar. The article details include authors (Hull, D; Pettifer, SR; Kell, DB), journal information (PLOS COMPUTATIONAL BIOLOGY, Vol 4, No 10, Oct 2008), and a summary. On the right, a "Red de citas" sidebar shows citation statistics: 57 times cited, 204 references, and a list of databases where it is cited.

Resumen

Many scientists now manage the bulk of their bibliographic information electronically, thereby organizing their publications and citation material from digital libraries. However, a library has been described as "thought in cold storage," and unfortunately many digital libraries can be cold, impersonal, isolated, and inaccessible places. In this Review, we discuss the current chilly state of digital libraries for the computational biologist, including PubMed, IEEE Xplore, the ACM digital library, ISI Web of Knowledge, Scopus, Citeseer, arXiv, DBLP, and Google Scholar. We illustrate the current process of using these libraries with a typical workflow, and highlight problems with managing data and metadata using URIs. We then examine a range of new applications such as **Zotero**, Mendeley, Mektentosj Papers, MyNCBI, CiteULike, Connotea, and HubMed that exploit the Web to make these digital libraries more personal, sociable, integrated, and accessible places. We conclude with how these applications may begin to help achieve a digital defrost, and discuss some of the issues that will help or hinder this in terms of making libraries on the Web warmer places in the future, becoming resources that are considerably more useful to both humans and machines.

Zotero, Mendeley, Memora, Paper, MyData, Science, Connotea, and HubMed that exploit the Web to make these digital libraries more personal, sociable, integrated, and accessible places. We conclude with how these applications may begin to help achieve a digital defrost, and discuss some of the issues that will help or hinder this in terms of making libraries on the Web warmer places in the future, becoming resources that are considerably more useful to both humans and machines.

“The apathy of the academic, scientific, and information communities coupled with the indifference or even active hostility...of many publishers renders literature-data-driven science still inaccessible.” – Peter Murray-Rust [1]

Zotero

Zotero es un programa de código abierto que permite a los usuarios recolectar, administrar y citar investigaciones de todo tipo de orígenes desde el navegador. Disponible inicialmente como complemento para el navegador Firefox, desde la versión 3.0 también funciona como programa independiente. Funciona como aplicación de administración de referencias, usada para administrar bibliografías y referencias al escribir ensayos y artículos. Su nombre proviene de la palabra albanesa zotëroj que significa "poseer/dominar". Su objetivo es **Saving to zotero.org...**

The screenshot shows a web browser displaying a ScienceDirect article. The browser's address bar shows the URL www.sciencedirect.com/science/article/pii/B978008100195000068. The browser's toolbar includes various icons, with a red box highlighting the 'Print' icon. Below the browser, a dark banner reads 'View ScienceDirect over a secure connection: switch to HTTPS'. The ScienceDirect logo is on the left, and navigation links for 'Journals', 'Books', and 'My account' are on the right. A 'Brought to you by: Biblioteca de la UPO' badge is also present. The article title is 'Managing Scientific Information and Research Data', published in 2015, pages 43-63. The specific article title is '6 – Science information literacy and the role of academic librarians' by Svetla Baykoucheva. A red box highlights the 'Download PDF' button. Another red box highlights a 'Saving to zotero.org...' notification at the bottom right, which includes a small icon of the article and the text '6 - Science information literacy and the rol...'. The article text begins with 'Have you ever noticed, when you teach, that the moment you start sharing a personal story with your students, they instantly snap to attention? You understand the value of stories. But some teachers don't insert many stories into their lessons, because they're worried that they don't have gripping stories to tell, or that they aren't good story tellers. So maybe it's worth identifying which kinds of stories are effective in making ideas stick. The answer is this: virtually any kind.' The author's name and the book title 'Chip Heath & Dan Heath (Made to Stick: Why Some Ideas Survive and Others Die, 2010)' are also visible.

Añadir documentos: capturar desde la web

The screenshot shows a web browser displaying a news article from 'lavanguardia.com'. The article title is 'La USAL acogerá una treintena de actividades en la Semana de la Ciencia de Castilla y León'. The browser's address bar shows the URL: 'www.lavanguardia.com/local/castilla-leon/20171107/432698400293/la-usal-acogera-una-treintena-de-actividades-en-la-semana-de-la-ciencia-de-castilla-y-leon.html'. The website's navigation bar includes categories like 'Al Minuto', 'Internacional', 'Política', 'Opinión', 'Vida', 'Deportes', 'Economía', 'Local', 'Gente', 'Cultura', 'Sucesos', and 'Temas'. A 'DIRECTO' banner at the top of the article area reads: 'Última hora sobre la situación política en Catalunya y los miembros del Govern cesado en Bélgica'. The article text states: 'La XIV Semana de la Ciencia de Castilla y León contará en la Universidad de Salamanca (USAL) con cerca de una treintena de actividades de distintos tipos, que tendrán lugar del 13 al 19 de noviembre.' Below the text are social media sharing buttons for Facebook and Twitter. A 'Más noticias' section on the right features two smaller article thumbnails: 'Junqueras alega en su recurso que la cárcel lesiona su derecho a participar en el 21D' and '¿Qué fue de... los protagonistas de 'El lago azul'?'. On the left side, there is a vertical advertisement for 'interwetten' with the text 'postar es nuestro deporte.' and 'UN BONO ASÍ ME ENCANTA.' Below it is a '100€' graphic. On the right side, there is a vertical advertisement for 'CORTEFIEL' featuring a woman in a jacket and the text 'SUMA ESTILOS MAN & WOMAN 30%'. At the bottom right, a 'Saving to UNIA...' notification box is visible, showing a list of saved items, including the current article.

The image shows the Zotero preferences window with the 'Sincronizar' (Sync) tab selected. The 'Sincronizando datos' (Syncing data) section is active, showing the user 'amdelvaz' and a 'Desvincular cuenta...' button. A red box highlights the 'Escoger bibliotecas...' (Choose libraries...) button. Below it, two checkboxes are checked: 'Sincronizar automáticamente' (Sync automatically) and 'Sincronizar el texto completo del contenido' (Sync full text of content). A link for 'Acerca de la sincronización' (About synchronization) is also visible.

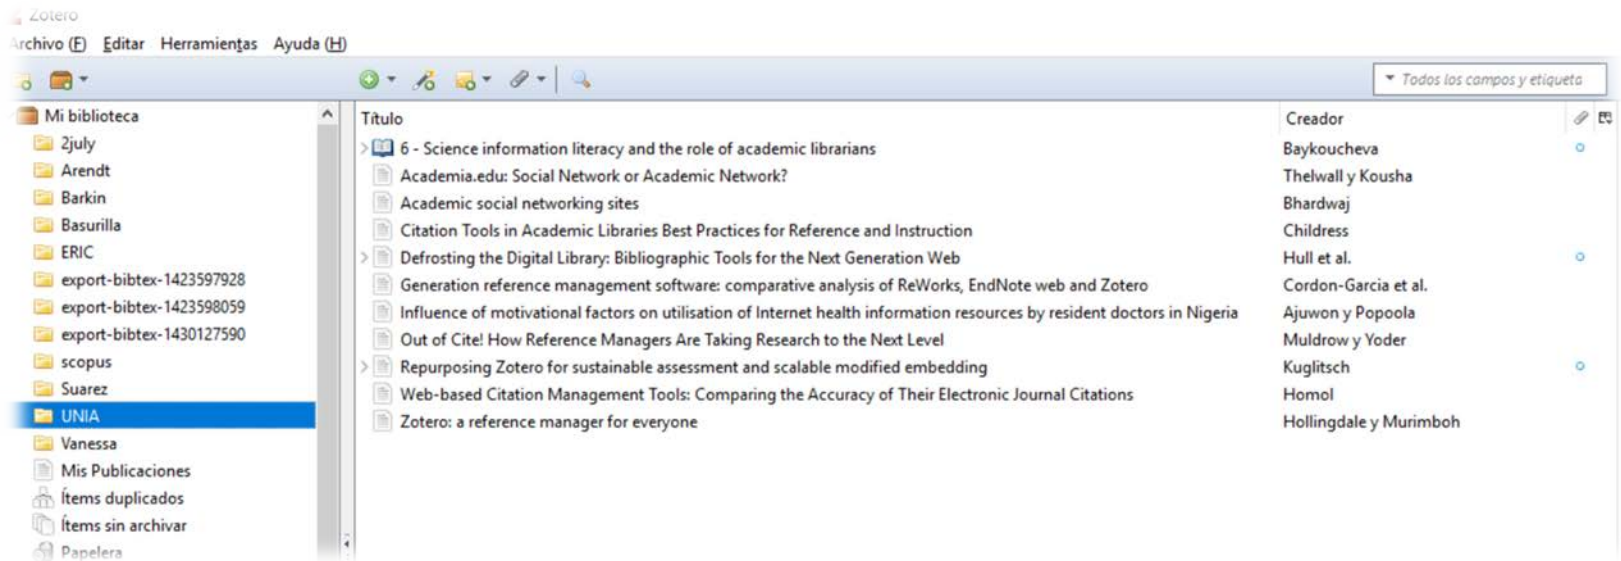

The 'Sincronización de archivos' (File synchronization) section is also visible, with two checked options for syncing attachments. The first option is 'Sincronizar los archivos adjuntos en Mi biblioteca usando Zotero' (Sync attachments in My library using Zotero), and the second is 'Sincronizar los archivos en bibliotecas de grupo usando el almacenaje de Zotero' (Sync attachments in group libraries using Zotero storage). Both have a dropdown menu set to 'en el momento de sincronizar' (at the time of sync).

At the bottom of the preferences window, there are 'OK', 'Cancel', and 'Help' buttons.

Overlaid on the preferences window is a 'Bibliotecas a sincronizar' (Libraries to sync) dialog box. It contains a table with two columns: 'Sincronizar' (Sync) and 'Biblioteca' (Library). A red box highlights the entire table. The 'Sincronizar' column has checkmarks for all entries. The 'Biblioteca' column lists: 'Mi Biblioteca & Fuentes' (My Library & Sources), 'Acceso abierto' (Open Access), 'Arendt', 'DOC MAS', 'Humanidades Digitales' (Digital Humanities), and 'Open Data Research'. An 'OK' button is located at the bottom right of the dialog box.

Partial text from another window is visible at the bottom right: '...nder cómo empezar a construir su bibliot...', 'la agregar elementos a Zotero mientras na...', and '? [Configure la sincronización](#) para seguir ju...'

Título: 6 - Science information literacy and the role of academic librarians

Autor: Baykouch..., Svetla

Resumen: Teaching information literacy is a major responsibility for subject/liaison librarians, but advances in information-retrieval systems, such as improved natural language searching and Semantic Web, could significantly change the role librarians play in this area. This chapter examines the future of information literacy and how librarians could redefine their role by expanding it to include management of scientific information and research data, different instruction formats, and new approaches for assessing student learning. This will make library instruction a much more appealing, engaging, and useful experience for students and researchers. Responding to the needs of a generation born into a digital culture will require that librarians learn new skills and play new roles in supporting the educational and research goals of their institutions be redefined.

The image shows a screenshot of a PDF viewer window. The title bar indicates the file is 'journal.pci.1000204.pdf' in Adobe Acrobat Pro. The menu bar includes 'Archivo', 'Edición', 'Ver', 'Ventana', and 'Ayuda'. The toolbar shows various icons for file operations and navigation. The main content area displays a document page with the following text:

Manchester, United Kingdom, 3 School of Computer Science, The University of Manchester, Manchester, United Kingdom

Abstract: Many scientists now manage the bulk of their bibliographic information electronically, thereby organizing their publications and citation material from digital libraries. However, a library has been described as “thought in cold storage,” and unfortunately many digital libraries can be cold, impersonal, isolated, and inaccessible places. In this Review, we discuss the current chilly state of digital libraries for the computational biologist, including PubMed, IEEE Xplore, the ACM digital library, ISI Web of Knowledge, Scopus, Citeseer, arXiv, DBLP, and Google Scholar. We illustrate the current process of using these libraries with a typical workflow, and highlight problems with managing data and metadata using URIs. We then examine a range of new applications such as Zotero, Mendeley, Mekentosj Papers, MyNCBI, CiteULike, Connotea, and PubMed that exploit the Web to make these digital libraries more personal, sociable, integrated, and accessible places. We conclude with how these applications may begin to help achieve a digital defrost, and discuss some of the issues that will help or hinder this in terms of making libraries on the Web warmer places in the future, becoming resources that are considerably more useful to both humans and machines.

“The abilty of the academic, scientific, and information communities

As far as computational Biologists are concerned, and for purposes of this Review, we shall define a digital library more broadly as a database of scientific and technical articles, conference publications, and books that can be searched and browsed using a Web browser. As of early 2008, there is a wide range of these digital libraries, but no single source covering all information (in part because of the cost, given that there are some 25,000 peer-reviewed journals publishing some 2.5 million articles per year [8]). Each library is isolated, balkanized, and has only partial coverage of the entire literature. This contrasts with the historically pre-eminent library of Alexandria whose great strength was that it brought together all the useful literature then available to a single location. Like Alexandria, most digital libraries are currently *read-only*, allowing users to search and browse information, but not to *write* new information nor add personal knowledge. Other digital libraries are in danger of becoming *write-only* “data-tombs” [9], where data are deposited but will probably never be accessed again. Indeed, the literature itself is now so vast that most scientists choose to access only a fraction of it [10], at potentially considerable intellectual loss [11] (see also [12]).

Digital libraries provide electronic access to documents, sometimes just to their abstracts and sometimes to the full text of the publication. Presently, the number of abstracts considerably exceeds the number of full-text papers, but with the emergence of Open Access initiatives (e.g., [13–16]), Institutional Repositories

The image shows the Zotero application window. On the left is a sidebar with a tree view of the library structure, including folders like 'Mi biblioteca', '2july', 'Arendt', 'Barkin', 'Basurilla', 'ERIC', 'export-bibtex-1423597928', 'export-bibtex-1423598059', 'export-bibtex-1430127590', 'scopus', 'Suarez', 'UNIA', 'Vanessa', 'Mis Publicaciones', 'Ítems duplicados', 'Ítems sin archivar', and 'Papelera'. Below the sidebar is a search bar with the text 'academic librarians acceptance bibliographic management Bibliographic management Bibliographic references biomedical literature...'. The main pane displays a list of items with columns for 'Título' and 'Creador'. The selected item is 'GestoresEPI.pdf'. A context menu is open over this item, listing actions such as 'Ver PDF', 'Mostrar archivo', 'Mostrar en la biblioteca', 'Quitar ítem de la colección...', 'Mover ítem a la papelera...', 'Exportar el ítem seleccionado...', 'Crear una bibliografía a partir del ítem seleccionado...', 'Producir un informe a partir del ítem seleccionado...', and 'Extraer los metadatos para el PDF'. The last option is highlighted with a red rectangular box. The right pane shows the details for 'GestoresEPI.pdf', including 'Nombre de archivo: GestoresEPI.pdf', 'Modificado: 7/11/2017 17:31:05', 'Indizado: No', and 'Relacionado: [pulsa aquí]'. Below the details is a rich text editor with various formatting options like bold, italic, underline, strikethrough, subscript, superscript, text color, background color, text color, text background color, and paragraph alignment.

The image shows a screenshot of a software interface with a dialog box in the foreground. The dialog box is titled "Progreso" and has a close button (X) in the top right corner. The main text inside the dialog says "Recuperación de metadatos completada". Below this text is a green progress bar that is completely filled. To the right of the progress bar is a button labeled "Cerrar". Below the progress bar is a table with two columns: "Nombre del PDF" and "Nombre del ítem". The first row of the table contains a green checkmark in the first column, "GestoresEPI.pdf" in the second column, and "Gestores de referencias de última generación: análisis..." in the third column. In the background, there is a list of files with their titles and authors. The visible entries are: "Academic social networking sites" by Bhardwaj, "Citation Tools in Academic Libraries ..." by Childress, "Web-based Citation Management T..." by Homol, and "Zotero: a reference manager for ever..." by Hollingdale y M... On the right side of the background window, there is a sidebar with the text "Indizado: No" and some other partially visible text.

Insertar citas y referencias bibliográficas

Los gestores más utilizados por su calidad, prestaciones y por las mejoras introducidas en los últimos años son *RefWorks*, *EndNote web* y *Zotero*. Poseen funciones similares aunque su nivel de prestaciones es diferente, por lo que es necesario evaluar sus aspectos más destacados si se quieren conocer sus posibilidades y su capacidad de adaptación a diferentes contextos de investigación. A continuación se exponen diversos parámetros de valoración aplicables a estos tres pro-

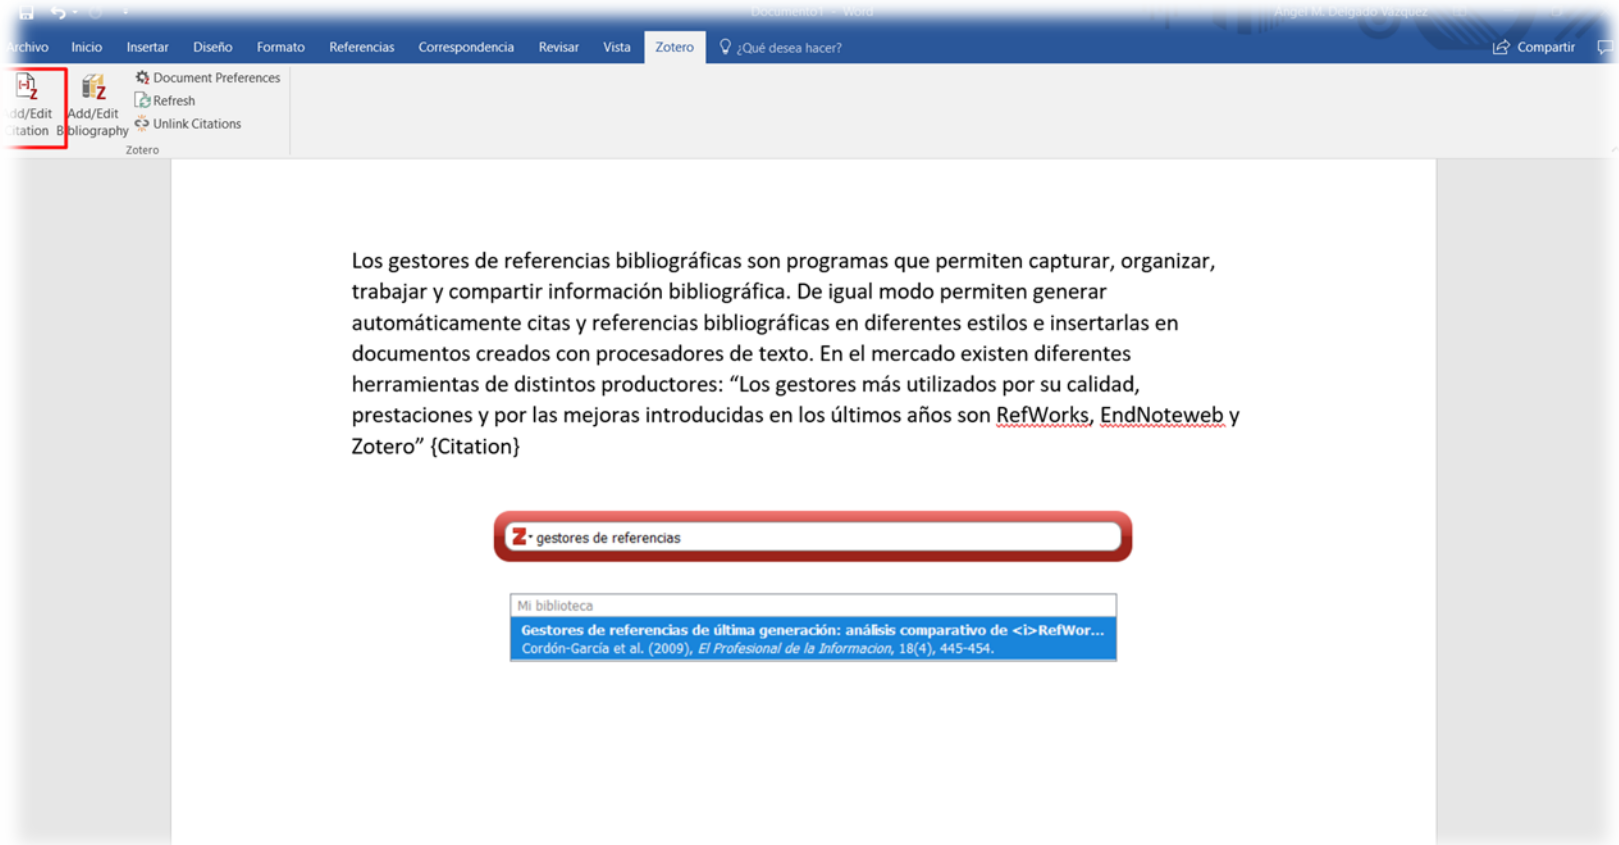

universidades españolas mantiene la suscripción institucional anual.

EndNote web es gratuito, pero con grandes limitaciones como la disponibilidad de un número máximo de registros (10.000), o un número limitado de carpetas a compartir (100).

Por último, *Zotero* es software libre con licencia abierta, lo que garantiza su completo uso y mejora por cualquier persona. Su limitación reside en que al ser una extensión

otra lengua que no fuera el inglés, incluso los propios manuales y guías de uso solamente estaban disponibles en esta lengua. Había alguna traducción no oficial, hecha por personas que habían trabajado con estas aplicaciones. *RefWorks* fue el primero en ofrecer una versión en castellano, y *Zotero* la tiene desde hace apenas un año. Esto ha favorecido el uso de gestores por parte de muchos investigadores, ya que a veces resulta complejo dominar la operatividad de un sistema cuando está en un idioma diferente

Insertar citas y referencias bibliográficas

The image shows a screenshot of the Microsoft Word interface with the Zotero ribbon selected. The ribbon includes options like 'Add/Edit Citation Bibliography', 'Refresh', and 'Unlink Citations'. The main text area contains a paragraph about reference management software. Below the text, a search bar with a red border contains the text 'gestores de referencias'. Below the search bar, a search result is displayed in a blue box, showing the title 'Gestores de referencias de última generación: análisis comparativo de <i>RefWor...' and the author 'Cordón-García et al. (2009), *El Profesional de la Información*, 18(4), 445-454.'

Los gestores de referencias bibliográficas son programas que permiten capturar, organizar, trabajar y compartir información bibliográfica. De igual modo permiten generar automáticamente citas y referencias bibliográficas en diferentes estilos e insertarlas en documentos creados con procesadores de texto. En el mercado existen diferentes herramientas de distintos productores: “Los gestores más utilizados por su calidad, prestaciones y por las mejoras introducidas en los últimos años son [RefWorks](#), [EndNoteweb](#) y [Zotero](#)” {Citation}

Available for Mac, Windows, and Linux

Collect

Organize

Cite

Sync

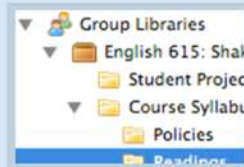

Collaborate

Work together and share with the world.

Works well with others.

Create and join research groups to focus on any topic you choose. Each group can share its own research library, complete with files, bibliographic data, notes, and discussion threads. Tag and analyze your research together with others. Work with a single colleague or an entire class: Zotero groups can include as many members as you please.

Share with the world. Or not.

Zotero groups can be private or public, open or closed. You decide. For example, you and a few colleagues might initially work on a research project in private. After publication, why not share your research notes and library with the world?

EXPERIENCIA PROFESIONAL

Zotero como herramienta de colaboración: personas

The screenshot displays the Zotero web interface. At the top, the Zotero logo is on the left, and navigation links for 'Welcome, Angel M. Delgado-Vázquez', 'Settings', 'Inbox', 'Download', and 'Log Out' are on the right. A blue 'Upgrade Storage' button is also visible. Below the logo, a dark navigation bar contains links for 'Home', 'My Library', 'Groups', 'People', 'Documentation', 'Forums', and 'Get Involved'. A search bar for forums is located to the right of these links.

The main content area is titled 'New Message'. On the left, a sidebar menu is highlighted with a red border. It includes a 'New Discussion' button at the top, followed by 'Quick Links' (Discussions, Search, Notification Preferences) and 'Discussion Filters' (Participated, Your Discussions, Your Bookmarks, Your Drafts). Below the sidebar is a 'New Message' button.

The 'New Message' form itself has a 'Recipients' field containing 'jalonsoarevalo x', a 'Subject' field, and a large text area for the message body. At the bottom of the form are 'Post Message' and 'Cancel' buttons.

The footer contains a list of links: 'Blog', 'Forums', 'Developers', 'Documentation', 'Privacy', 'Get Involved', 'Jobs', and 'About'. To the right is the logo for the 'ROY ROSENZWEIG Center FOR History AND New Media', which consists of a 2x2 grid of letters (C, H, N, M) and the text 'ROY ROSENZWEIG Center FOR History AND New Media'.

Zotero como herramienta de colaboración: grupos

The screenshot shows the Zotero Groups page. At the top, the Zotero logo is on the left, and a user welcome message 'Welcome, Ángel M. Delgado-Vázquez' is on the right, along with links for 'Settings', 'Inbox', 'Download', and 'Log Out'. A blue 'Upgrade Storage' button is also visible. Below the header is a navigation menu with 'Home', 'My Library', 'Groups' (selected), 'People', 'Documentation', 'Forums', and 'Get Involved'. A search bar is on the right of the menu.

The main content area shows the breadcrumb 'Home > Groups' and the title 'Zotero Groups'. There are links for 'Search for Groups' and 'Create a New Group'. The page is divided into two columns. The left column lists three groups: 'Acceso abierto', 'Arendt', and 'DOC MAS'. The right column is titled 'New Group Discussions' and contains the text 'No recent group discussions.'

Zotero [zoh-TAIR-oh] is a free, easy-to-use tool to help you **collect, organize, cite, and share** your research sources.

Download Now

Available for Mac, Windows, and Linux

Collect

Organize

Cite

Sync

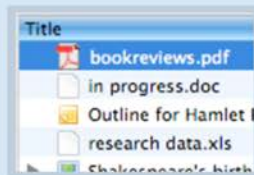

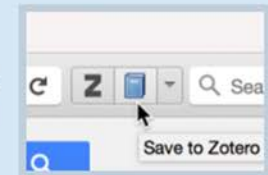

Collaborate

Grab your research with a single click.

A personal research assistant.

Zotero is the only research tool that automatically senses content in your web browser, allowing you to add it to your personal library with a single click. Whether you're searching for a preprint on arXiv.org, a journal article from JSTOR, a news story from the *New York Times*, or a book from your university library catalog, Zotero has you covered with support for thousands of sites.

Store anything.

Zotero collects all your research in a single, searchable interface. You can add PDFs, images, audio and video files, snapshots of web pages, and really anything else. Zotero automatically indexes the full-text content of your library, enabling you to find exactly what you're looking for with just a few keystrokes.

Zotero como herramienta de colaboración: grupos

The screenshot shows a web interface for a Zotero forum group. At the top, there is a navigation bar with links for Home, My Library, Groups, People, Documentation, Forums, and Get Involved. A search bar is located to the right of the Forums link. Below the navigation bar, the page title is "zotero.org · Group Invitation". On the left side, there is a sidebar with a "New Discussion" button and a "Quick Links" section containing links for Discussions, Search, Notification, and Preferences. Below this is a "Discussion Filters" section with links for Participated, Your Discussions, Your Bookmarks, and Your Drafts. At the bottom of the sidebar, there are buttons for "New Message" and "Delete Conversation", and a section for "In this Conversation" with links for zotero.org and adelvaz. A section titled "Add People to this Conversation" is also visible at the bottom left. The main content area shows a message from "zotero.org" posted 18 minutes ago. The message text reads: "Hi adelvaz, amdelvaz has invited you to join the group 'UNIA curso' at Zotero.org. You can find more information about this group and accept or decline the invitation at https://www.zotero.org/groups/1915108/unia_curso?token=a42fd9ffb3e07eb17c1b5905c78fd90d Best, Team Zotero --". Below the message, there is a paragraph defining Zotero: "Zotero [zoh-TAIR-oh] is a free, easy-to-use tool to help you collect, organize, cite, and share your research sources. It lives right where you do your work—in the web browser itself."

Hi adelvaz,

amdelvaz has invited you to join the group 'UNIA curso' at Zotero.org
You can find more information about this group and accept or decline the invitation at https://www.zotero.org/groups/1915108/unia_curso?token=a42fd9ffb3e07eb17c1b5905c78fd90d

Best,
Team Zotero

JOURNAL OF
SCHOOL HEALTH

GENERAL ARTICLE

The Association Between Electronic Bullying and School Absenteeism Among High School Students in the United States*

ERIN GRINSHTEYN, PhD, MS^a Y. TONY YANG, ScD, LLM, MPH^b

ABSTRACT

BACKGROUND: We examined the relationship between exposure to electronic bullying and absenteeism as a result of being afraid.

METHODS: This multivariate, multinomial regression analysis of the 2013 Youth Risk Behavior Survey data assessed the association between experiencing electronic bullying in the past year and how often students were absent in the last month due to feeling unsafe at/in transit to school. The model controlled for other predictors of school absence including demographics, physical/behavioral health, and risk factors. Missing data were multiply imputed.

RESULTS: Electronic bullying was significantly associated with absences. Controlling for model covariates, the relative risk of missing 1 day of school was 1.77 times higher, the relative risk of missing 2 to 3 days of school per month increased by a factor of 2.08, and the relative risk of missing 4 or more days of school per month increased by a factor of 1.77 for those who experienced electronic bullying in the past year compared with those who were not electronically bullied.

CONCLUSIONS: Electronic bullying's association with absenteeism places it among already recognized negative influences such as depression and binge drinking, necessitating schools to implement policies to mediate the resulting harmful effects.

Keywords: bullying; cyber bullying; electronic bullying; public health; child and adolescent health; violence.

Citation: Grinshteyn E, Yang YT. The association between electronic bullying and school absenteeism among high school students in the United States. *J Sch Health*. 2017; 87: 142-149.
